

The Benetech MaxClean product line is designed to maximize user benefits and extend the life of your belt conveyors.

## HOT PINK High Temperature Solutions

### AdvantEdge Blade-

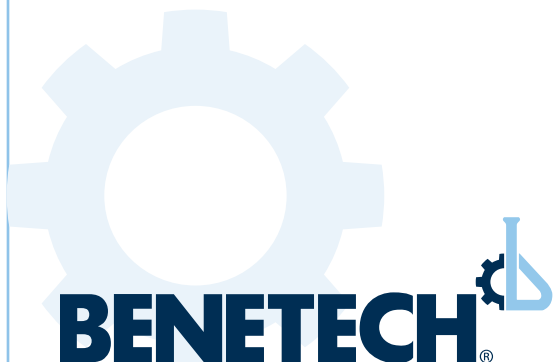

Hot Pink (90A): *Our hot pink high temperature AdvantEdge blade has no equals.* Formulated and designed to withstand 375 °F continuous operating temperature (with intermittent temperature spikes of up to 450 °F) our high temperature blade offers performance none of our competitors can match. The unique formulation, combined with our AdvantEdge blade design, will operate in the hottest environments and provide belt cleaning and wear life performance that has been impossible to achieve before now. Many have tried to put belt cleaners in very hot environments with no success. ***Finally there is a solution!***

\*High temp blade available for BEP1, BEP2, and BES1 belt cleaner assemblies.

### High Temperature Skirting

Hot Pink: Our high temperature skirting features the same polyurethane as our high temperature blade. It is also designed to withstand 375°F continuous operating temperature with intermittent temperature spikes up to 450°F.

Our standard Hot Pink skirting has a 45 ° beveled edge and is available in three heights-4 ¾", 6" and 8"- all in up to 11 FT lengths. Additional edges available upon request.
