

Magna-Patch™

A fast, temporary patching solution for leaks and holes in steel, pipes and other processing equipment until a permanent repair can be made

- Reusable- Comes with replaceable wear pads for repeated use
- Tension screw pushes the disposable wear pad tight against the leak- all in seconds
- Quick solution for spill containment
- Patented technology

Available Styles:

MP-611 (mini)- for use on smaller diameter piping and radii surfaces, or hard to reach areas

MP-711- For use on larger steel surfaces such as bins and hoppers, chute bottoms and troughs or similar

MP-811- for use on larger diameter piping and radii surfaces, or tough holes in corner or odd shaped steel parts or equipment

Magna-Patch™
