

Simple Slide Return Roller

Superior product. Simple installation.

Benetech's Simple Slide Return Rollers allow for safe and simple installation and maintenance while providing optimal belt support between the discharge point and the tail pulley. The compact size of the frames allows for placement even in confined spaces.

Key Features & Benefits

One-Sided Serviceability-

Service can be done by one person from one side of the belt

Optimal Support-

Rollers support the belt to prevent stretching, sagging, and failure.

Easy Installation and Service-

No need to raise belt to replace roller

Improved Safety-

Simple Slide Out frame design reduces safety risks and allows quick and easy roller removal or maintenance

- Available with standard or wide base frames
- Comes in any belt width
- Available to purchase frame alone or with rollers
- Can be customized to fit any idler manufacturers' rollers

Simple Slide Questionnaire

Rolls

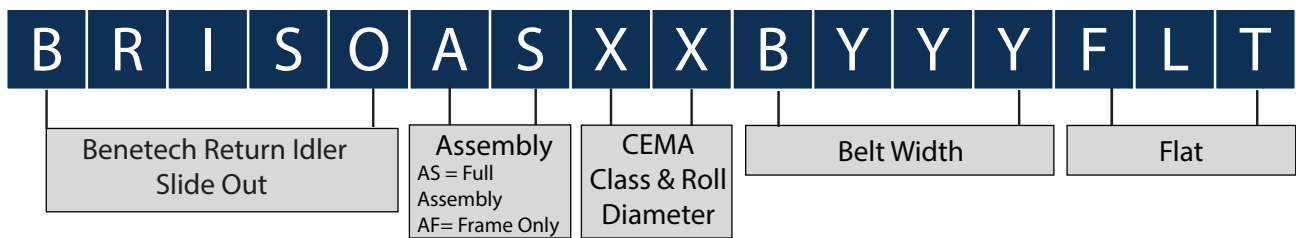

CEMA Class: _____
